

# G DATA ANTIVIRUS

## BASIC PROTECTION AGAINST VIRUSES AND OTHER COMPUTER MALWARE

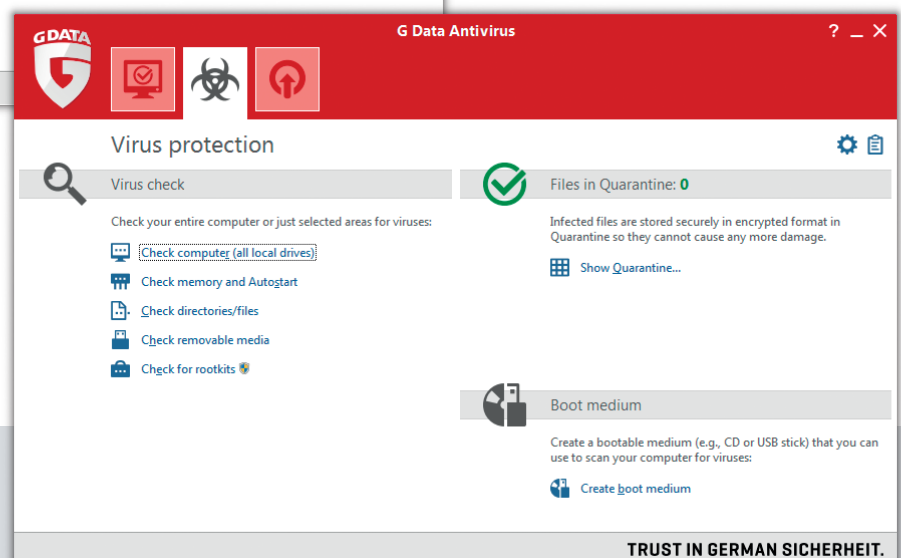

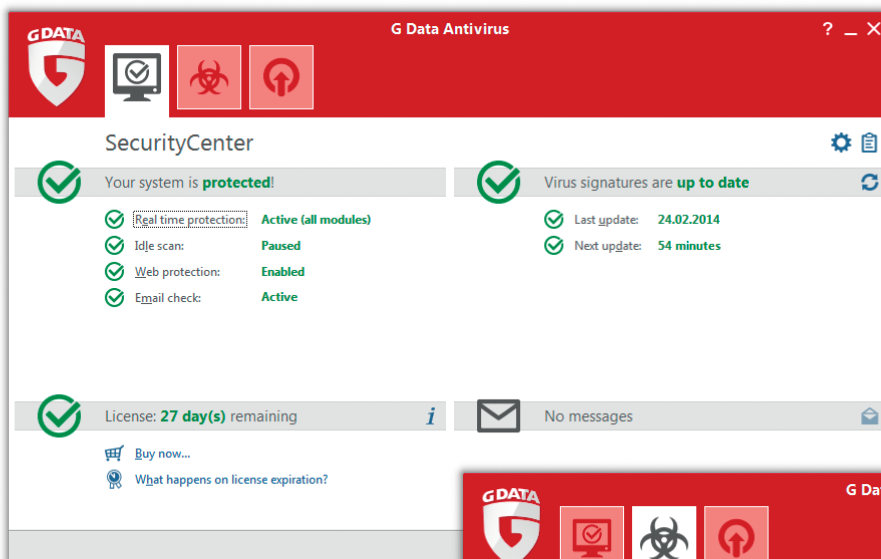

How security should be: G Data Antivirus reliably protects your PC against viruses - and your personal data while banking or shopping online. So you no longer have to worry about the most common threats.

New in this version is comprehensive exploit protection. This also safeguards your PC against malware that targets and exploits security vulnerabilities in your installed software.

### About G Data

G Data has been carrying out research for 25 years for your security. The result is exceptional, comprehensive protection for your PC, which is easy to install, simple to operate and offers excellent performance levels.

That's **GERMAN SICHERHEIT**.
